FHFA House Price Index® Up 0.3 Percent in July; Up 2.6 Percent from Last Year

Washington, D.C. – U.S. house prices rose nationwide in July, up **0.3 percent** from the previous month, according to the U.S. Federal Housing (FHFA) seasonally adjusted monthly House Price Index (FHFA HPI®). House prices rose **2.6 percent** from July 2025 to July 2026. The previously reported 0.0 percent price movement in June remained unchanged.

For the nine census divisions, seasonally adjusted monthly home price changes ranged from **-0.8 percent** in the Mountain division to **+1.5 percent** in the Middle Atlantic division. The 12-month changes ranged from **+0.6 percent** in the Mountain division to **+6.3 percent** in the Middle Atlantic division.

The FHFA HPI is a comprehensive collection of publicly available house price indexes that measure changes in single-family home values based on data that extend back to the mid-1970s from all 50 states and over 400 American cities. It incorporates tens of millions of home sales and offers insights about house price changes at the national, census division, state, metro area, county, ZIP code, and census tract levels. FHFA uses a fully transparent methodology based upon a weighted, repeat-sales statistical technique to analyze house price transaction data.

FHFA releases HPI data and reports quarterly and monthly. The flagship FHFA HPI uses seasonally adjusted, purchase-only data from Fannie Mae and Freddie Mac. Additional indexes use other data, including refinances, mortgages insured by the Federal Housing Administration, and real property records. All the indexes (including their historic values) and information about future HPI release dates are available on FHFA's website: https://www.fhfa.gov/HPI.

- The next HPI report will be released on October 27, 2026, and will include monthly data through August of 2026.

The Federal Housing Finance Agency regulates Fannie Mae, Freddie Mac, and the 11 Federal Home Loan Banks. These government-sponsored enterprises provide more than $8.7 trillion in funding for the U.S. mortgage markets and financial institutions. Additional information is available at www.FHFA.gov, on X @FHFA, YouTube, Facebook, and LinkedIn.

Further background information

Overview of FHFA HPI

The FHFA House Price Index® (FHFA HPI®) is a broad economic measure of the movement of single-family house prices in the United States. While FHFA produces the HPI by statutory mandate (12 U.S.C. 4542), it began in 1996 with FHFA's predecessor agency, the Office of Federal Housing Enterprise Oversight. The initial reports contained information about state, regional, and national house price movements. But sample coverage has expanded with better access to new data sources and technological improvements for processing such information. Today, indexes cover all 50 states and over 400 American cities with information extending back to the mid-1970s.

FHFA constructs several indexes for different market geographies and periods. The entire suite is often referenced as the "FHFA HPI" to reflect that we create all indexes in the same technical manner. The flagship FHFA HPI is the Purchase-Only Index, which uses seasonally adjusted, purchase-only data. This index is the most referenced in press releases, news stories, and social media. FHFA created additional indexes to address questions about house price changes across the broader single-family property market (such as by including refinances or nonconforming loans) and in specific markets and market segments (for example, by focusing on Puerto Rico or manufactured housing). Data constraints preclude the production of some kinds of indexes in certain geographic areas, but multiple index types (flavors) are generally available for a given area. FHFA releases index flavors such as:

- "Purchase-Only" HPI: Tracks changes in transaction prices for conforming, conventional mortgages that are purchased or securitized
- "All-Transactions" HPI: Adds appraisal values from refinance mortgages to the Purchase-Only HPI data sample
- "Expanded-Data" HPI: Adds sales price information sourced from county recorder offices and FHA-backed mortgages to the Purchase-Only HPI data sample. We use this index to adjust the conforming loan limits, which establish the maximum origination balance a loan can have to remain eligible for acquisition by Fannie Mae and Freddie Mac.
- "Distress-Free" HPI: Removes short sales and sales of bank-owned properties from the Purchase-Only dataset
- "Annual" HPI: Uses the All-Transactions data but constructs indexes on a yearly basis to provide data for very small geographic areas like counties, ZIP codes, and census tracts

The summary table below details the frequency and geography of the available indexes.

	National	Census Divisions	States	MSAs or Cities	ZIP3, Non-metro	ZIP Codes	Counties	Census Tracts
Monthly	✓	✓						
Quarterly	✓	✓	✓	✓	✓			
Annual	✓	✓	✓	✓	✓	✓	✓	✓

FHFA builds the HPI suite on over 100 million home sales transactions and offers insights about house price fluctuations at various geographic levels. For more information, see the HPI Frequently Asked Questions.

FHFA HPI Release Dates for 2026

Public FHFA HPI® releases occur at 9AM ET and include a press release, tables, figures, and associated data.

Date	Release Type	Latest Included Data
Tuesday, January 27	Monthly Index	November 2025
Tuesday, February 24	**Quarterly Index (with Monthly Tables)**	**December 2025 and 2025Q4**
