In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/2000.

(a) Due to shorter available sample periods and the implied impact on the standardisation of the time series, past values of the ESI and EEI were revised to align the variability of the indicators to those of EU Member States. Detailled results for individual survey questions are available on the Commission BCS website: https://ec.europa.eu/economy_finance/bcs

(b) Publication of Estonian survey data and Maltese business survey data is temporarily suspended due to changes in partner institutes.

The economic sentiment indicator, the employment expectations indicator and the economic uncertainty indicator are composite indicators. More information about their computation is available in the user guide published on the Commission BCS website.

All confidence indicators are balances.

The country weights have been updated in January 2026.
